Why we need garbage collection in our community?

I strongly believe we need garbage collectors in our community because they are very vital. If we did not have garbage collectors we will get sick and every ^{world} one will die. If we throw it on the floor the ^{world} will stink. It is not fair for garbage collectors to pick ^{people's} rubbish. Garbage collectors make the ^{streets} clean. For us, I strongly believe we need garbage collectors in our community.

Why we need garbage collectors in our community

I strongly believe garbage collectors are vital in our community. ✓

If we had no garbage collectors in the world the world will be stinky and smelly, the water will be poisonous and the air will be bad.

Garbage collectors help our community and earth by making it clean.

If we throw rubbish it will damage our environment and make us sick. ✓

Garbage collectors wake up early because people throw rubbish on the ground so put your rubbish in the bin it is not fair and don't be rude to garbage collectors. ✓

I believe...

I believe garbage collectors are very helpful and vital.

✓
Excellent job

Why we need garbage collectors
in our community? ✓✓

I believe that we need garbage collectors
in our community because they are
very vital. At night the garbage trucks
come and take all of your rubbish
from the bins. But first you need to
take out your bins and they put all
the rubbish in a big field and they
always have to wake up early. You
should never throw your rubbish on
the floor and the rubbish ^{stinks} ~~sinks~~ and
the people can get sick and people
have to clean up your ^{mess} ~~meses~~ up.

I believe that garbage collectors are vital
in our community. ✓✓

Why do we need garbage collectors in our community?

I strongly believe garbage collectors are very vital in our community. If there is no garbage collectors the whole land and city will be full of rubbish. It is also not fair because they wake up at night do you like to collect rubbish of course not! So it is important that you throw your rubbish in the bin and always do the right thing.

Why we need garbage collectors in our community

I believe that garbage collectors are vital and if there is no garbage collectors, the world will be full of rubbish and we will get sick. It is so important for example garbage collectors are hard working people in our community. The garbage collectors wake early and put your rubbish in the bin. The world will ^{not} get clean if garbage collectors do not collect rubbish. It is a hard work so I believe that. ✓ we need garbage collectors in our community

Why we need garbage collectors in our community?

I strongly believe we need garbage collectors in our community. If there were no garbage collectors the world would be dirty and we would have rubbish everywhere. It is not fair that they have to wake up early to collect rubbish. This is also very rude! We have to people to put their rubbish in the bin. I believe we need garbage collectors in our community.
